

CURRICULUM VITAE

MARTHA LILIANA HUERTAS MADRID

Statistician | M.Sc. Student in Statistics | Applied Statistics, Data Science and Machine Learning

GitHub: marthahuertas-lgtm
LinkedIn: martha-huertas-aa9172217
ORCID: 0009-0001-6293-5755
Lattes: 4037329197904888

ACADEMIC PROFILE

Statistician with training focused on data analysis and the application of statistical and computational methods. Currently pursuing a Master's degree in Statistics at the Federal University of Pernambuco (UFPE), Brazil.

Main area of interest is Applied Statistics, with special focus on data analysis, statistical modeling, predictive analytics and machine learning methods.

Skilled in organizing and interpreting quantitative information, writing technical and academic reports, and communicating results through tables, charts and visualizations.

AREAS OF INTEREST

Applied Statistics · Data Science · Statistical Modeling · Predictive Analytics · Machine Learning · Computational Methods · Data Visualization · Interpretation of Results

TECHNICAL SKILLS

- Data analysis and organization
- Description and summarization of datasets
- Exploratory data analysis
- Application of statistical methods
- Statistical modeling
- Predictive analytics
- Classification methods
- Model evaluation and interpretation
- Dimensionality reduction techniques
- Technical and academic report writing
- Reproducible analysis workflows

SOFT SKILLS

- Attention to detail
- Independent and team work
- Clear communication of technical information
- Interpretation of quantitative results
- Technical and academic writing
- Structured problem solving
- Fast learning and adaptation to new tools
- Organization of information and academic activities

EDUCATION

2025 — present — **M.Sc. in Statistics (in progress)**
Federal University of Pernambuco — UFPE, Brazil
Focus: Statistics, data analysis, statistical modeling and machine learning.

2017 — 2023 — **B.Sc. in Statistics**
University of Córdoba — Colombia
Training in statistical, mathematical and computational foundations for data analysis and interpretation.

Thesis — **Logistic regression models**
University of Córdoba
Undergraduate thesis on the application of logistic regression models and quantitative data analysis.

TOOLS AND SOFTWARE

Programming and statistical analysis
R · RStudio · Python · MATLAB · SQL · SAS

Data science and machine learning
tidyverse · tidymodels · ranger · XGBoost · LightGBM · themis · DALEX · fairmodels · SHAP · LIME

Reporting, documentation and productivity
R Markdown · Quarto · LaTeX · Microsoft Excel · Word · PowerPoint · Access · Power BI

ADDITIONAL TRAINING

2021 — **Microsoft Office Tools: Word**
SENA — Colombia

2021 — **Microsoft Office 2016 Tools: Excel**
SENA — Colombia

2021 — **Excel and Access for Business Administrative Application Development**
SENA — Colombia

2021 — **Management Indicators**
SENA — Colombia

2023 — **Variables and Control Structures in Python**
SENA — Colombia

ACADEMIC AND SCIENTIFIC PARTICIPATION

Participation in academic and scientific activities, meetings and events related to the Sciences, university education and Statistics.

Interest in academic spaces focused on knowledge exchange, scientific updating and continuing education.

LANGUAGES

- **Spanish:** native — good comprehension, speaking, reading and writing.
- **English:** fair comprehension and reading; basic speaking and writing.
- **Portuguese:** basic comprehension, speaking, reading and writing.
